

Beverage and bottling industry

Clients:
Coca Cola,
Schweppes,
P&N Beverages, Carlton
United Breweries,
Visy P.E.T, Dairy
Farmers

Locations:
Australia, New
Zealand, USA,
Vietnam, Fiji, Noumea
& PNG

Value:
Up to AUD\$350,000

**Air conveyors, Auto-
mated Guide Rails,
Slatband conveyors,
De-Palletisers, Pallet-
isers, Gripper Eleva-
tors, Warmer Installa-
tions, Pallet Convey-
ors, Pallet Turntables,
Single Liners, Ma-
chine Guarding**

Our capability

Australis Engineering has been designing and installing projects since 1983, with the beverage and bottling industry forming a large part of our success.

Our track record includes large projects such as designing and manufacturing whole production lines to smaller jobs such as retrofitting our *EzyChange Guide Rails* to a client's existing production line. Our strong experience and track record in this market segment extends to all areas of the beverage manufacturing and packaging processes. Australis has designed and installed de-palletisers, complete bottling lines, palletisers, pallet conveyors, as well as many special purpose machines.

Some examples of Australis Engineering's track record for clients in the beverage industry:

- Australis Engineering is the only Australian manufacturer of Air Conveyors with installations for clients such as Schweppes, Coca-Cola, Visy P.E.T, Dairy Farmers, and P&N Beverages.
- Designed and installed a fully customised, one-off robotic palletiser to suit Aldi bottle trays. The machine palletises bottles onto small trays at a speed of up to 450 bottles per minute and has been successfully operated since 2001.
- Installed our completely automated *Ezy-Change* guide rail system at Visy Perth, for their air conveyors. The system was custom designed to provide significant time and money savings, whilst still providing repeatability of guide rail settings
- Installed various *LowPro Conveyor* lines for customers such as Visy, Bevco and Orchy Juices. The *LowPro* range of conveyors are an economical conveyor range designed to compete with aluminium profile conveyors. However a significant benefit of our *LowPro* range is that it is **fully fabricated in stainless steel** so are food grade and wash down compliant.
